

ATTENTION TO THE **BASICS** UNDERPINS ECONOMIC AND EFFECTIVE ASSET MANAGEMENT !!!

With the evolution of technology, the pressures to improve business efficiency and the move towards reducing internal resources leading to multi-tasking, there is a danger that business or their staff can sometimes overlook the importance of attending to the basics. At Firstcall, attending to the basics is our core business! The following are just two examples of basic condition monitoring services available that can make a real difference to your business. However, we will tailor our services to meet your exact needs.

Small Site Condition Monitoring

Firstcall provides a comprehensive range of condition monitoring services from basic routine inspections to complex regimes.

For **£85**,* Firstcall will visit site:-

- Inspect and report on security issues, fence, doors, windows
- Inspect and record plant & equipment readings as defined by YOU! (Check all Oil, water, fuel levels, Check & Top up DC batteries, etc)
- Inspect and report on general condition of site
- Remove general rubbish
- Produce and submit maintenance report with photo's of defects where appropriate

Benefits:-

- Independent approach (Audit) to condition monitoring
- Flexibility – Frequency of visits and content set by YOU to your business priorities
- Economic solution to routine maintenance activities
- Allows you to size internal resources accordingly, focusing teams on skilled fault and routine maintenance rather than condition monitoring
- Ensures maximum network reliability through effective conditional monitoring
- Maintain good PR and quality image status – *the physical condition of your assets speak volumes about the attitude to the way you manage your company and your networks reliability!*

Applications:-

- Small substations e.g. 11kv distributions subs, Equipment Accommodation Modules, remote buildings

Large Site Condition Monitoring

For **£149*** Essentially, the same as the above although designed to cater for more condition monitoring activities per site. Firstcall will visit site:-

- Inspect and report on security issues, fence, doors, windows
- Inspect and record plant & equipment readings as defined by YOU!
- Check all Oil, water, fuel levels, Check & Top up DC batteries, circuit breaker & compressor readings.
- Check back up generation and test run if required
- Inspect and report on general condition of site
- Remove general rubbish
- Produce and submit maintenance report with photo's of defects where appropriate

Applications:- larger substations e.g. 66, 132, 275, 400kv subs, etc. In addition, Firstcall can provide vegetation control services / application of herbicide, Thermovision surveys, Sampling:- Oil, etc, general handyman services, etc

* Dependent on size, complexity of site and volume and frequency of sites under maintenance. The more sites the more economic the price is for your business.
